Read the text and answer the questions .

The sun, at the center of solar system, and the planets around it are among the wonders of creation . Venus is the second planet from the sun which is sometimes called Earth twin. This is because their sizes and weights are alike . you can see it without a telescope and it's the second brightest object in the night sky after the moon . Thick yellow clouds are always around Venus . However , Venus and Earth are also different . Venus doesn't have life and it doesn't have water like Earth . It takes two hundred and twenty four days to orbit the sun , for Earth it is three hundred and sixty five days . Venus has no moons . It is a dry , hot planet. Strong winds blow all the time .
